

Startup Blueprint Generator Agent Knowledge Base - Part 1

IBM AICTE–Edunet Foundation Internship

Table of Contents

1. 1. Introduction to Startups
2. 2. Startup Lifecycle
3. 3. Idea Validation
4. 4. Problem–Solution Fit
5. 5. Product–Market Fit
6. 6. Market Research
7. 7. Customer Persona
8. 8. Competitor Analysis
9. 9. Business Model Canvas
10. 10. Revenue Models

1. Introduction to Startups

A startup is an innovation-driven business designed to solve a problem with a scalable model. Unlike traditional businesses, startups prioritize rapid learning, experimentation, and growth.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

2. Startup Lifecycle

Stages: Idea → Validation → MVP → Launch → Growth → Scaling. Validate assumptions before investing heavily.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

3. Idea Validation

Interview potential customers, define the problem, test demand with surveys or landing pages, and refine based on feedback.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

4. Problem–Solution Fit

Ensure the proposed solution directly addresses a real customer pain point and provides measurable value.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

5. Product–Market Fit

Achieved when customers consistently adopt and recommend the product because it solves an important need.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

6. Market Research

Identify TAM, SAM, SOM, market trends, competitors, customer needs, and pricing opportunities before launch.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

7. Customer Persona

Define age, occupation, goals, pain points, buying behavior, and preferred communication channels.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

8. Competitor Analysis

Compare competitors on pricing, features, strengths, weaknesses, and unique value proposition.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

9. Business Model Canvas

Nine blocks: Customer Segments, Value Proposition, Channels, Customer Relationships, Revenue Streams, Key Resources, Key Activities, Key Partners, Cost Structure.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.

10. Revenue Models

Common models include subscription, freemium, advertising, marketplace commission, licensing, SaaS, affiliate, and direct sales.

Key Takeaways

- Keep documentation concise.
- Validate using customer feedback.
- Use structured planning before implementation.
